

5M

SMART TECHNOLOGIES

WHO are we?

5M represents modern and progressive company with 100 employees and 3000m² production space, which takes advantage of its **own research and development**. We cooperate with research and test institutes and analogical university departments.

Certificated ISO 9001 :2001

WHAT do we produce and develop?

- structural epoxy adhesives LETOXIT® for high strength bonds (used in Micro-accelerometer MIMOSA, fighter plane Albatros L39)
- composite pultruded profiles
- aluminum sandwich constructions (panels)
- epoxy resins LETOXIT® for lamination
- LF Technology – unique epoxy resin foil for lamination

HOW can we help you?

- technical consultancy for bonding of all materials and constructions
- technical consultancy for glassfibre laminate production
- research and development regarding customer request
- experience in hi – tech technologies (aerospace industry)
- innovative solution due to own laboratory
